West Australian Repeater Group – Technical and General Net – Introduction.

This script is suggested for the Net Controller to read out as the introduction of the Technical and General Net, held on Sundays at 10:30 am local/0230Z.

Good Morning.

This is VK6 Romeo Romeo Golf, the club station of the West Australian Repeater Group for the Technical and General Net for Sunday (insert date).

Your Net Controller this morning is (Name and callsign).

Welcome to all on frequency.

This net is open to everyone - not just WARG members – but we encourage all those who use or have an interest in repeaters to become members of WARG – still only $25 per year.

WARG has been in existence since 1975 and we currently operate repeaters at 11 sites in metro and country areas. Maintaining, renewing and expanding this network continues to be our main task.

WARG's regular activities includes meetings and working bees.

Meetings take place on the first Monday of the month, or the second Monday if the first is a Public Holiday, and may include guest speakers or technical presentations.

Our next meeting is on Monday (insert date) at the Pelican Point Sea Scouts facility at 12 Australia II Drive in Crawley. At the end of the road past the yacht clubs.

Doors open around 1900hrs for a 1930hrs start. Tea, coffee and refreshments are available and there is time for socialising before and after the meeting.

Working bees take place at repeater sites as required and when we can arrange them.
Details will vary depending on the site, access, and the type of work to be done and will be circulated on the WARG email reflector and the WARG website at www.warg.org.au.

The Net is for questions or discussions about WARG technical or administrative business, and if time allows other matters relevant to Amateur Radio. It usually runs no more than one hour.

Mobile, Portable and country stations will be asked to call in first.

Next, stations connecting remotely via Allstar, Echolink or other means will follow. (allow extra time for remote links to activate).

Finally, all other stations.

Could stations calling in state if they have any business or are just listening.

(Now invite stations to call in – Mobile/Portable/Country, then Remote, then all others).

(At close of Net) This is VK6RRG saying 73 and returning the repeater to normal use.
